A rapidly changing and increasingly complex security landscape has implored organisations across the world to harden their network infrastructure and maximize the value of the security solution. In today's overarching mechanism of fighting security threats, both virtual and physical, new and innovative surveillance technologies hold substantial weight and therefore must be regarded as fundamental. Upfront planning, coupled with sound policies and procedures, can assist organisations significantly in overcoming various security threats. While no organisation can fully mitigate these threats, staying abreast of global technologies and developments can lead to a 'state of readiness' crucial in the fight against them. Delcom Infotech, a newly formed and created digital online magazine, aims to serve this notion by highlighting the increasingly modifying fields of communications, surveillance and networking service industries, with a fierce focus on global technology and methods.

The digital magazine's primary objective is to elucidate the masses on the latest intricacies in global technologies, related to IP surveillance, unified communication, audio/video Integration, PA systems, and

IT network integration, to name a few. Published by Delcom Telesystems, a long standing technology provider in the security sector, the vision of Delcom Infotech is to establish one's presence, in order to identify and report on technologies in the Americas, which will provide enterprising audiences in India (and other neighboring Asian countries) with sound and positive solutions. Conscious about the quality offered to viewers, the digital online magazine publication team will provide: featured articles, editorials, photography, high resolution videos/ film, live footage interviews/ speakers, blogging opportunities to the public, business to business link, membership and social media outlets, conventions, and advertising. Delcom Telesystems aims to position Delcom Infotech as one of the leading online magazines in the world, with a substantial audience in the USA and India within the first 10 years of its initiation. The magazine, which shall print an initial issue in September/December 2017, is directed at companies throughout India, the United States and other countries that deal in communications.

Delcom Telesystems hopes to emulate its prestige with Delcom Infotech by developing the same trusty rapport with its online viewers and members as it has with its many long lasting clients. Having collaborated with some of the leading giants in this industry such as Microsoft, Sony, Bosch, Avaya, CISCO, Siemens, Polycom, Crestron, Pelco, Milestone, Juniper and Videonetics, Delcom has robust plans to embrace the practices of these companies by featuring their latest happenings in its new online publication. Delcom Infotech is for all individuals invested in telecommunications and media systems. The magazine has a commitment to be

a platform to profile companies who are representing telecommunication system vision in the marketplace and who can both encourage and provide role models to other men and women. It will also show the latest technology and new and upcoming systems being created and used around the world. With this venture, Delcom Telesystems aims to be a vessel to inform persons/companies about telecommunication and principles in everyday business and will encourage interaction in the industry by engaging a large number of stakeholders.
